

## **PHASE-SEPARATION PAPER**

**Permits the organic phase to go through, retaining the watery phase on the paper**

- Hydrophobic filter, with silicone
- Permeable to the organic phase
- Retains solid components / watery phase
- The density of the organic phase does not affect the separation process

### **Technical specifications:**

<b>Grade</b>	<b>Filtration s / 100 ml Herzberg</b>	<b>Grams gr/m<sup>2</sup></b>	<b>Thickness mm</b>
<b>302</b>	1200	97	0,18

### **Applications:**

- For all types of organic solutions: ether, oil, chloroform, ...
- Can replace the use of decanting funnels
- Combined chemical processes

### **Ordering information:**

## **PHASE-SEPARATION PAPER**

<b>Grade</b>	<b>302 SF</b>
<b>Ø 70 mm</b>	DP302070
<b>90 mm</b>	DP302090
<b>110 mm</b>	DP302110
<b>125 mm</b>	DP302125
<b>150 mm</b>	DP302150
<b>185 mm</b>	DP302185
<b>240 mm</b>	DP302240

DP: Round filters

Presentation: 100 units / box

**Other sizes available on request**
